DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 61-216715. Based on the international preliminary examination report, examiner concurs with counterpart examination findings that the anticipatory reference, cited as D1 in that report, fully anticipates the claimed invention.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1 and 3-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of copending Application No. 10/502,724. Although the conflicting claims are not identical, they are not patentably distinct from each other because the copending application uses substantially the same compounds and fillers as the presently claimed invention such that it would have been obvious to substitute the specifically claimed compounds and fillers to satisfy the same function, in the same way, with the same result.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

Claims 1, and 3-16 are considered allowable over the prior art. The closest reference is considered Qualkinbush et al. (US 6,378,224) which discloses an odor and moisture removing footwear device, but not the independently claimed dehumidifying compound, odor combating compound, and starch/cellulose filler acting as a thickener or gelling agent inside its package further inserted into a footwear interior or furniture storage space. Other references cited with this action contain one or more of the claimed elements, but not the necessary motivation or combination suggestion to obviate the claimed invention.
